Experience

Software Tester

SOFTELIO

Constanta, Romania

08/2019 - 12/2020

Tested and validated functionalities of a web application.

Responsibilities:

- Analyze changes made to branch code (C#) by programmer.
- Analyze the test scenarios and, if necessary, draw up others.
- Go through test scenarios: UI / UX testing, database changes, XML / JSON file captures where applicable.
- I report other problems, new or pre-existing.
- Time estimates.
- The company's product being management software for insurance brokers, I also follow different behaviors related to bidding, saving and issuing insurance policies.

01/2021 - 6/2022

Software developer

- Contributed to a leading insurance software application in the local market, developed using ASP.NET WebForms.
- Focused on bug fixing, progressing to solve more complex issues as experience increased.
- Collaborated with team members to implement new features and improve existing functionalities.

Touch Media

Contanta, Romania

6/2022 - present

Full Stack Developer

- Developed both web and mobile applications. Utilized React Native for mobile development and JavaScript frameworks like ReactJS for web applications paired with Redux Toolkit for global state management.
- Augmentation of existing REST APIs by adding additional end-points while also developing new APIs.
- The technology used for the Back-End is PHP's Laravel, along with relational databases (MySQL).
- Solid use of HTML and CSS.
- Usage of git as a Version Control System to keep the projects up to date.
- Experience working with Kanban-style web application Trello/Jira to keep track of given tasks.
